

# Postural and Body Type Analyzer with Body Composition Measurement

## ATR-B14

Leading professional physical testing technology in the industry, meeting all users' needs for professional physical testing; Comprehensive and multi-dimensional data analysis provides .

### Body Composition Analysis:

- Bioelectrical Impedance Measurement (DSM-BIA)
- 8-Point Tactile Electrode System
- Direct Segmental Measurements
- Multiple Frequencies

### Results Reporting:

- Available in printed format or via QR code
- Postural Assessment: Cervical Spine, Shoulder, Pelvic Bone, Knee
- Muscle-Fat Analysis (Segmental)
- Body type assessment
- Obesity assessment
- Body Circumference

### Posture Analysis:

- Imaging technology : Mirror Design with 3D camera
- AI 3D modeling: structured light depth image capture and human recognition technology;
- 360 ° fully automatic turntable for Posture Screening

# Body Check Analyzer with Body Composition Measurement

ATR-V13

The intelligent data management system enables efficient collection of multiple vital sign parameters. It offers a complete assessment of body composition, metabolic status, and overall health. Supporting early health intervention, comprehensive chronic disease management, and improved public health service delivery.

Health Risk Monitoring

Wellness Management

## Results Parameters:

- Blood pressure
- Body Temperature
- Fat mass
- Fat percentage
- Basal Metabolism
- Body water content
- Muscle mass
- Protein mass
- Protein content
- Bone salt
- Lean body weight
- Intracellular fluid volume
- Intracellular fluid rate
- Extracellular fluid volume
- Extracellular fluid rate
- Visceral fat Level,
- Bone mass

## Body Composition Analysis:

- Bioelectrical Impedance Measurement (DSM-BIA)
- 8-Point Tactile Electrode System
- Direct Segmental Measurements
- Multiple Frequencies
